

Predicting the best location to open Restaurant in Lahore

Description of Problem:

Lahore is one of the biggest cities in Pakistan. It is especially famous for its food. However, restaurants are located in certain hubs of the city where locals and travelers prefer to eat generally. A potential investor in food business wants to know the best location to open a new restaurant in Lahore.

Description of Data:

The list of restaurants, their location, their address, their latitude and longitude coordinates is extracted using four square ID. The extracted data is then converted to panda data frames. Then using restaurant's longitude and latitude coordinates they are represented on Folium maps. Using that it is concluded which locality of Lahore is best for opening restaurants.
